PLASTOVÝ A HLINÍKOVÝ SYSTÉM ODKOUŘENÍ ALMEVA

ZÁKLADNÍ CHARAKTERISTIKY SYSTÉMU

Přednosti

Jedná se o moderní vyspělý systém odvodu spalin, kde léty prověřeným výrobním postupem bylo dosaženo dokonalé přesnosti a kvality všech trubek, tvarovek a ostatního příslušenství. Precizně navržený tvar hrdlového spoje umožňuje vynikající hydraulické vlastnosti potrubí, což zaručuje dokonalé proudění spalin a nízké riziko zanášení.

Hrdlové spoje jsou těsněny elastomerovými kroužky, které zajišťují okamžitou vynikající těsnost, pevnost, ale i dlouhodobou pružnost spoje. To na rozdíl od jiných typů spojů urychluje a usnadňuje jinak obtížnou kompletaci systému.

Bezproblémová práce, rychlá montáž a snadná revize umožňuje stavebním a montážním firmám vysokou produktivitu práce jak v nové výstavbě komínů, tak i při sanaci stávajících komínových průduchů.

Použití vzhledem k druhu spotřebiče a typu spalinové cesty

- plastový systém odkouření slouží k odvodu spalin od kondenzačních a nízkoteplotních spotřebičů s nejvyšší teplotou spalin do 120°C
- hliníkový systém odkouření slouží k odvodu spalin od atmosférických spotřebičů typu „TURBO“ s nejvyšší teplotou spalin do 200°C
- je určen převážně pro přetlakové a vysokopřetlakové spalinové cesty (tlak uvnitř komínové vložky je během provozu vyšší, než vně). Může být použit i pro komíny s přirozeným tahem
- není určen pro spalinové cesty, ve kterých může dojít k vyhoření sazí
- vhodný pro komíny plánovitě provozované v mokřém provozním režimu
- použitelný pouze pro spalinovou cestu od spotřebičů spalujících plynná paliva resp. zemní plyn (L, H) a kapalná paliva (LTO s obsahem síry $\leq 0,2\%$, kerosin)

Použití vzhledem k místu instalace

- pro novou výstavbu (montáž) komínů
- pro sanaci stávajících komínů a komínových průduchů
- možnost aplikace příslušného systému jak v interiéru, tak v exteriéru

Prvky systému

Systém odvodu spalin Almeva disponuje řadou komponentů, které jsou nenahraditelnou součástí funkční moderní spalinové cesty. Obsahuje přes 200 prvků, kde každý je proveden v různých dimenzích, celkem tedy více než 2250 katalogových položek tvořících ucelený spalinový systém. Díky nespočetnému množství dokonale sladěných komponentů nabízí Almeva nejširší sortiment plastového a hliníkového systému odkouření se zaručenou kvalitou.
